

Color your Phone and Run together!

KEEP CALM
AND GO THE
COLOR
RUN

skinZONE™

THE
COLOR
RUN™

Dress your phone
and show you're
a color runner...

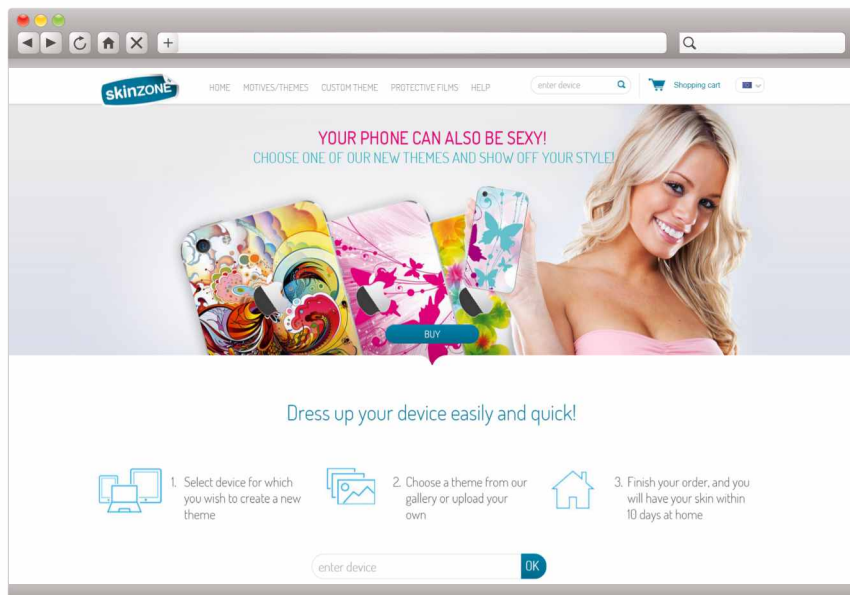

What are they?

Skins are vinyl stickers with a heavy-duty protective lamination with a UV filter that can be applied to any device with a flat surface, to express one's passion and keep the device free of bumps and scratches.

Our skins are quality custom-made for each device, easy to apply and leave no unwanted residue after removal. They are waterproof and use the latest colour printing technology for long-lasting images. New technology works with microchannels on the adhesive side that helps remove air while applying the skin and leaves no air bubbles.
