

About us

Once upon a time in 2007, two guys sitting in a pub came up with the idea to make a grey world a lot more colourful. They decided to open the first E-shop specialising in the personalisation of notebooks and smartphones. As the business grew they were constantly adding the latest technologies, so today Skinzone is your specialist in the complete protection and personalisation of smartphones, tablets, notebooks, e-readers, smart watches, coffee machines, cameras, gaming consoles, navigation, fridges, etc. Skinzone will make your device unique and original, and is bringing the freedom of expression to people everywhere.

Production

As we grow, so do the number of employees and production centres where we can serve our customers. We currently have 4 production centres in Prague and Budapest. Apart from our main production centres we also produce skins, cases and general device protection in ALZA.cz's warehouse, and are also present in their largest showroom in Prague. Every year a large number of new products come to market, and we are at the forefront of providing protection and personalisation for all of them.

Dress and protect your device

...with our unique decorative skins and personalised protective cases. We have something for everyone, or you can even upload your own image and message and truly stand out from the crowd. Turn your device into a statement - everyone will notice and ask questions. By providing a wide variety of designs for most of the devices on the market, Skinzone is bringing the freedom of expression to people everywhere.

Skins

Skins are vinyl stickers with a heavy-duty protective lamination that can be applied to any device with a flat surface, to express one's sense of style and keep the device protected from dents and scratches. Our premium quality skins are custom-made for each device, easy to apply and leave no unwanted residue after removal. They are waterproof and use the latest colour printing technology for long-lasting images.

3D printed cases

Do you want a protective case with your own style and really stand out from the crowd? Well, it's never been easier when you choose from our selection of cases and styles, your smartphone or tablet will be fully protected. You'll probably hear 'Wow, that's cool!' from your friends! Our printed polycarbonate cases are strong and durable and protect your device at the back and sides.

Premium quality protective film & tempered glass

Screenshield™ offers 2 effective ways of protecting your device on a daily basis. The first is a premium quality, fully transparent polyurethane film, and the second option is our ultra-tough tempered glass.

Screenshield™ film

Guaranteed materials
Fully transparent, highly durable polyurethane film guarantees your device will stay fully protected. Easy-to-apply laminated vinyl skin with UV filter keeps colours stable and makes you and your device original.

Lifetime warranty*
We will happily replace your Screenshield™ film in the unlikely event it gets unintentionally scratched or torn, providing you have followed the correct application procedure for your device. For more information about our lifetime warranty, please visit: www.skinzone.eu/document/lifetimewarranty

Recommended best seller
Screenshield™ protection quickly became the best seller in its category (high quality protection film and decorative skin) with a customer satisfaction rating of over 92%. People tend to ask about the skin on your device and want it too - luckily we have a skin design for almost everybody!

100% scratch resistant
The protection film used by Screenshield™ was developed to protect the finish on sports cars and now it's available to you. Skinzone protection films offer a revolutionary way of protecting your smartphone, tablet PC, e-reader or other device with a touch display.

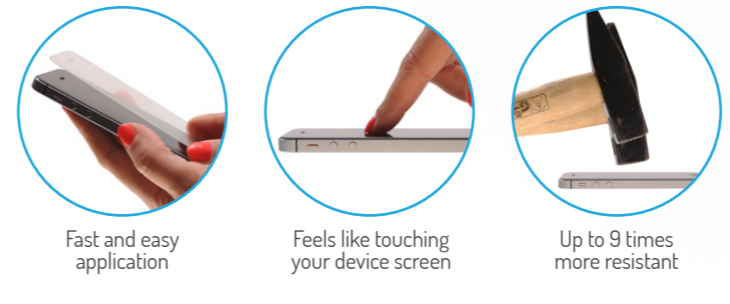

Be unique
Skins are a fashionable way of expressing yourself. Turn your device into a statement and stand out from the crowd, everyone will notice and ask questions.

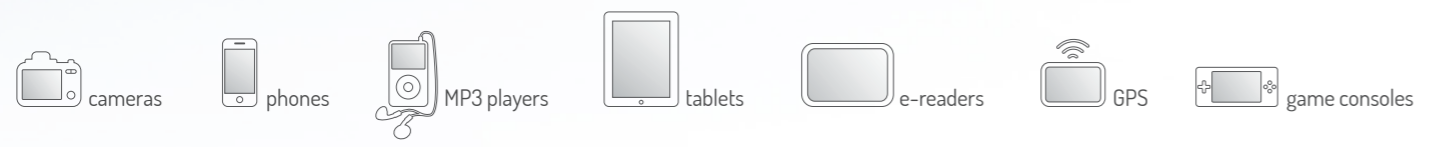

Screenshield™ tempered glass

Ultra-tough tempered glass with Lifetime warranty*
95% light transmittance, 9H hardness with super anti-scratch and explosion-proof processing. Nano materials with high-end processing makes your phone screen always look new and smooth.

The ultimate protection for your device.

Fast and easy application Feels like touching your device screen Up to 9 times more resistant

Personalise a case with your own image & text...

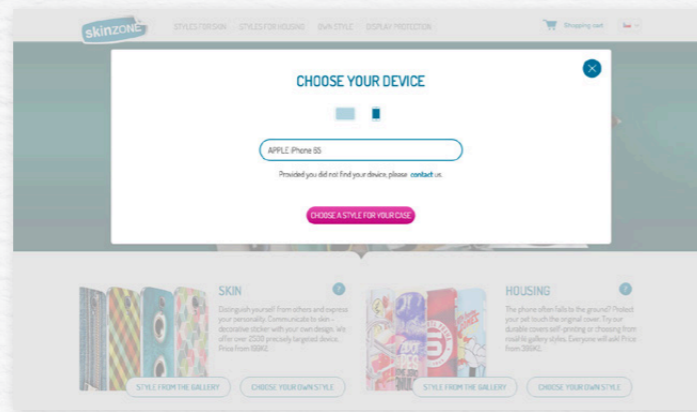

STEP 1

In the CASES section, click on 'Choose your own style'. The case is a polycarbonate material where we transfer your chosen design motif.

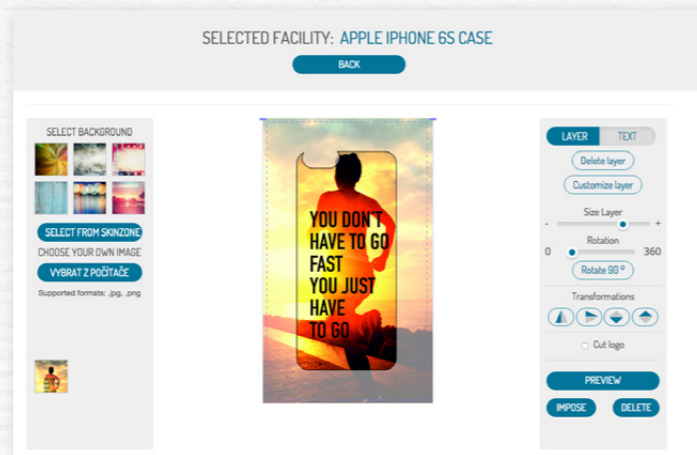

STEP 2

Enter the name of your device. Confirm by clicking 'Choose a style for your case'. If your device is not found, please click on the 'contact us' link.

STEP 3

Upload your own image and add your text in the Designer window. Position your image as you wish and press Order.

STEP 4

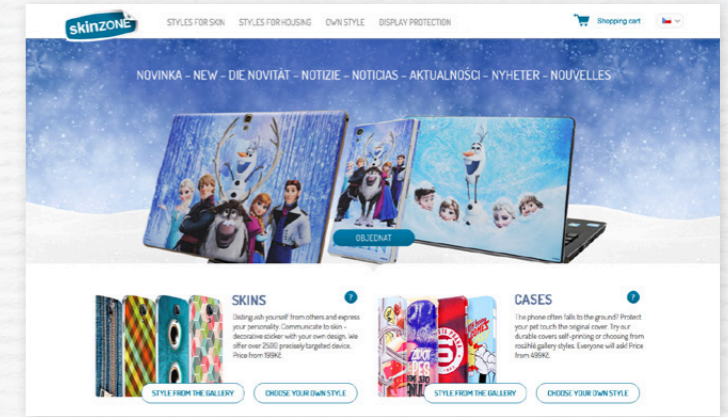

Confirm your order and you will get your unique protection case delivered within 5 days.

Personalise your device with a skin and image from our gallery

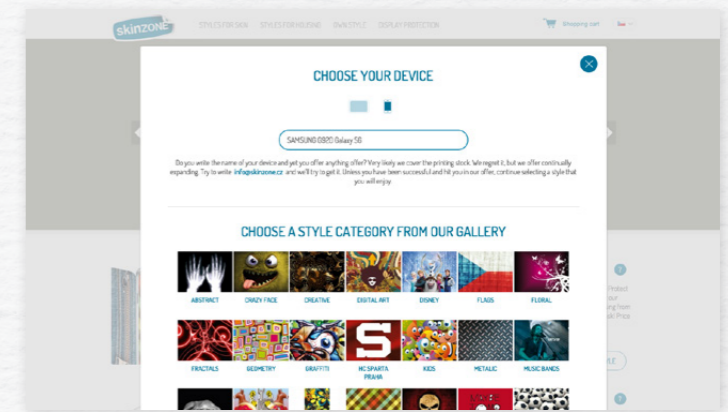

STEP 1

In the SKINS section, click on 'Select from the gallery'. A skin is a vinyl sticker with protective UV lamination for colour longevity.

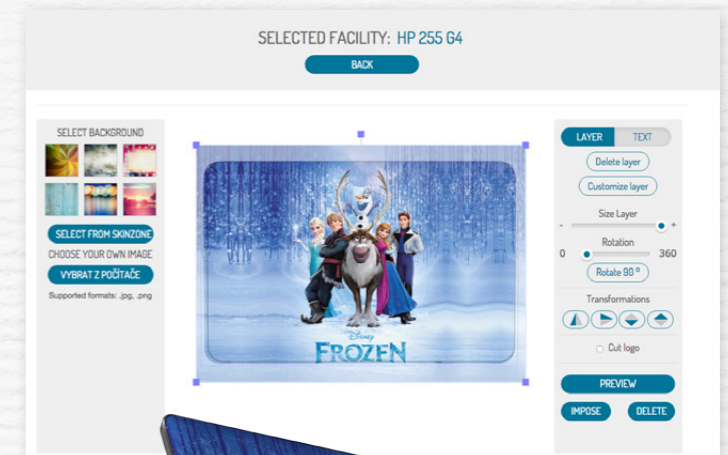

STEP 2

Enter the name of your device and confirm. Choose a category, then choose a design motif within the category.

STEP 3

If you are happy with the positioning of the design motif, click on button 'I need this', otherwise, select 'Designer' to edit the position and add your text if needed.

STEP 4

Confirm your order and you will get your unique protection delivered within 5 days.
